

# ASSISTIVE TECHNOLOGY REUTILIZATION GRANT APPLICATION 2023

Florida Alliance for Assistive Services and Technology

The Florida Alliance for Assistive Services and Technology, Inc. (FAAST) is accepting grant applications for assistive technology reutilization activities. Reutilization grants are \$5,000 and support activities from October 1, 2023-September 30, 2024. The purpose of this grant program is to increase reutilization services for Floridians who have disabilities throughout the state.

FAAST describes reutilization activities as activities that exchange, repair, recycle or other reutilization of assistive technology devices (including durable medical equipment), which may include redistribution through device sales, loans, rentals, or donations.

Grant applicants must provide reutilization services as defined:

- Device Exchange
  - Listing devices in a “want ad”-type posting to [FAAST's AT Classifieds](#). Consumers can contact and arrange to obtain the device (either by purchasing it or obtaining it for free) from the current owner. Exchange activities do not involve warehousing inventory and do not include sanitation or refurbishing of used devices.
- Device Reassignment and Refurbishment
  - Activities in which devices are accepted (usually by donation) into an inventory; are sanitized and/or refurbished as needed; and then offered for sale, loan, rental, or given away to consumers as redistributed products. The consumer becomes the permanent owner of the device.
- Device Repair
  - Activities in which device(s) are repaired for an individual (without the ownership of the device changing hands) thus avoiding the owner's need to purchase a new device.

To be eligible, organizations must 1) currently have an assistive technology and/or durable medical equipment reutilization program(s) or similar program(s), 2) be a nonprofit, and 3) be based in Florida. Preference will be given to organizations led by or employing individuals who have disabilities who utilize assistive technologies.

To ensure statewide support, only one grant will be given per geographical area (as determined by completed applications received). The geographical areas to be served by this award is: [Gulf, Holmes, Jackson, Washington, Bay, Jackson, Calhoun, Franklin](#). Services provided by this grant will be reported by FAAST to the Florida Division of Vocational Rehabilitation (VR) and the
